

A pixelated, black and white illustration of the mathematical equation $f(x) = 1$. The characters are composed of a grid of black and gray pixels, giving it a digital or retro aesthetic. The function f is written in a stylized, slightly italicized font. The variable x is also in a similar style, with a small dot above it. The equals sign is represented by two parallel horizontal bars. The constant 1 is a simple, bold digit. The entire equation is centered on a plain white background.
